

Lock in your products freshness with a **ONE WAY VALVE**

Tempo Plastics one-way degassing valve, although very popular in the coffee industry, has multiple applications in many industries. Our flexible valves are applied in line and offer equal degassing rates to the traditional rigid versions at a more competitive price point.

Tempo Plastics can customize your package with one-way degassing valves and combine this with our award winning printing capabilities so your products stand out on the shelf and maintain their quality.

Possibilities include:

- Coffee
- Lawn & Garden
- Health & Wellness
- Medical Packaging

Getting More out of your **Package**
